

KRONOS I3

PARACHUTE RECOVERY SYSTEM FOR **dji** INSPIRE 3 

The Kronos I3 plug & play parachute recovery system for the DJI Inspire 3 makes your flights safer by slowing your drone's rate of descent and impact energy in the event of a problem. The parachute can be triggered automatically or manually using the Klick trigger remote control.

CERTIFICATIONS

C5 CLASS & MOC M2

The C5 accessories kit (PRS & FTS) allows the operator to go directly from the original C3 class to the EASA C5 class. The parachute also complies with the MoC Light-UAS.2512 (M2) published by EASA. These compliances are essential requirements for drone operators wishing to perform STS-01 flight operations or when developing an SORA or PDRA.

S1 / S2 / S3 DGAC

The Kronos I3 parachute recovery system enables your drone to be approved for French S3 scenarios. Coupled with a Kronos FTS, you can certify your drone for all DGAC scenarios. (S1/S2/S3).

COMPATIBILITY

KRONOS I3 FTS

The Kronos I3 parachute must be sold with a FTS to ensure it works properly. The Kronos I3 FTS is installed between the batteries and the drone, in less than a minute, directly by the pilot.

GEOCAGING SOLUTIONS

Zephyr CC & ScaleFlyt Geocaging module lets you create a virtual cage representing your drone's flight zone. Coupled with a Dronavia FTS, this module automatically switches off the engines and deploys the parachute if the drone is not confined.

KLICK SYSTEMS

30 H
OF AUTONOMY

Ergonomic control from the DJI remote control, with LEDs indicating status and advanced functions.

OPTIONAL

LONG RANGE

Extend the range to more than 10 kilometres.

OPTIONAL

KLICK +

Avoid the possibility of accidental activation.

OPTIONAL

KLICK PRO

Give your triggers greater security.
